**I'll use assembly
language to go to
the Moon**

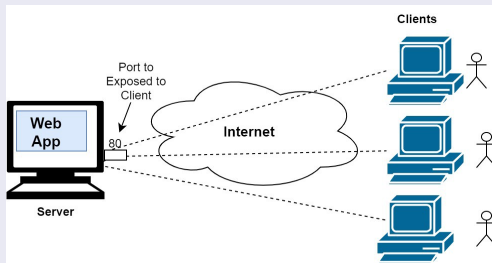

2021

**Should I use React or
Vue for my portfolio?
Ahhh... any tips?**

Advantages

Deploy once, use everywhere

Frontend and Backend

Front end vs. Back end.

As soon as I split
these checks, make
some more coffee,
run my three
desserts, clean up
that spill, take the
order from Table 5
and refill waters,
yes I will get you
another slice of
lemon.

junior react developer

senior react developer

```
1 import getDaysDifference from '../commons/getDaysDifference';
2 const getAvgTurnOverDays = ({ list }) => {
3   const turnOverDays = list.reduce((result, p) => {
4     if(p.closedDate) {
5       result = result === null ? 0 : result;
6       return result + getDaysDifference({ day1: p.openDate, day2: p.closedDate});
7     } else {
8       return null;
9     }
10   }, null);
11   return turnOverDays === null ? null : Math.floor(turnOverDays/list.length);
12 };
13
14 export default getAvgTurnOverDays;
```

Tests

```
1 import given from 'given2';
2 import getAvgTurnOverDays from './getAvgTurnOverDays';
3
4 describe('getAvgTurnOverDays', () => {
5   given('l1', () => ({
6     closedDate: '12/20/2020',
7     openDate: '12/18/2020',
8   }));
9   given('l2', () => ({
10     closedDate: '12/11/2020',
11     openDate: '11/15/2020',
12   }));
13   given('l3', () => ({
14     closedDate: given.closedDate,
15     openDate: '11/15/2020',
16   }));
17   given('list', () => (
18     ([ given.l1, given.l2, given.l3 ])
19   ));
20
21   given('result', () => getAvgTurnOverDays({ list: given.list }))
22
23   describe('when the closedDate is absent', () => {
24     given('closedDate', () => undefined);
25     it('returns null', () => {
26       expect(given.result).toBe(null);
27     });
28   });
29
30   describe('when the closedDate exists', () => {
31     given('closedDate', () => '11/15/2020');
32     it('returns avg turnover rate', () => {
33       expect(given.result).toBe(13);
34     });
35   });
36 });
```
